STEPS TO BEGIN WITH Prodigy Infotech Internship: -

Step 1: - Install the latest version of Python in your Desktop.

Step 2: - Go to CMD (Command Prompt) in your desktop.
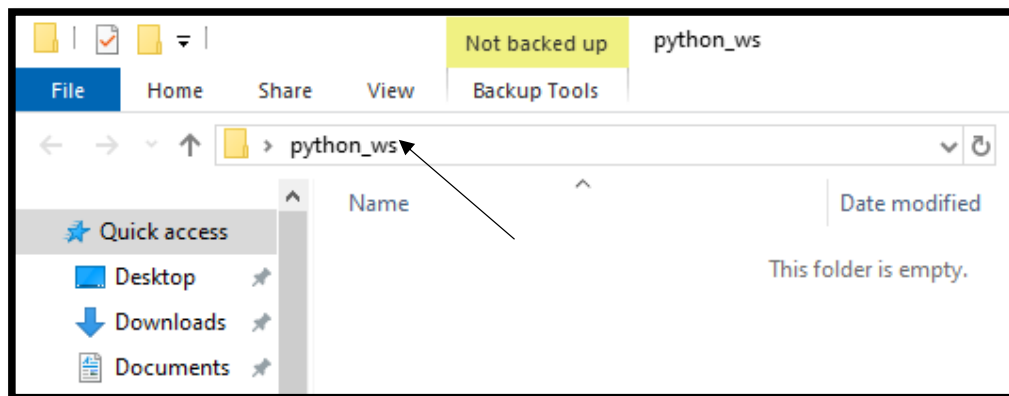

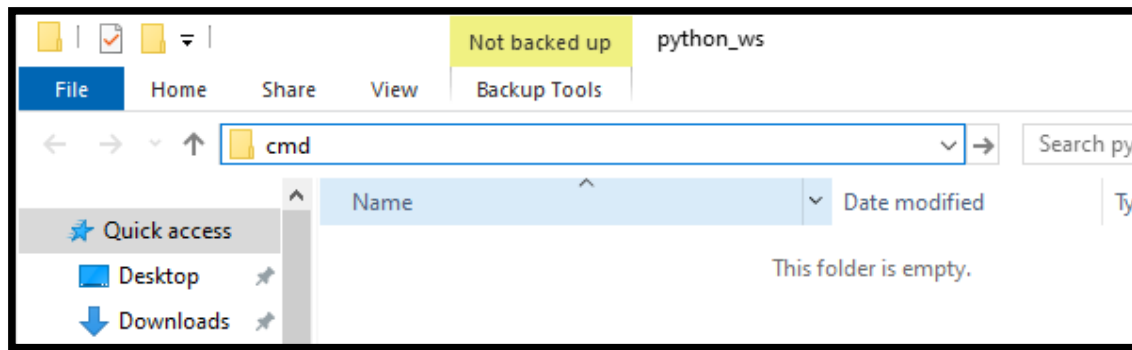

Then type command: pip install jupyter

Step 3: - Now, to use this create a new folder on your desktop.

You may name it as "python_ws"

Go inside that folder and inside its path type CMD which will redirect you to its pre-entered path in cmd.

NOTE: You can do it manually as well.

**Step 4**: - Once your Cmd is opened type the following command:

jupyter notebook

Step 5: - Once done with these steps it will ask you to select as of "How or Where to Run" Jupyter Lab?

You can select Microsoft Edge.

Step 6: - Go to New -> In Drop down menu Select Python 3(ipykernel).

Step 7: - Rename the Untitled file once opened.

Step 8: - This renamed file will now be visible in your "python_ws" folder
